***P3a. Description:** (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

Building N-233 is one of two curved buildings along Bush Circle that are rendered in a Moderne architectural style. This building has a two-story central massing, which is flanked on either side by one-story portions. It has a concrete foundation, concrete structural system, and a scored concrete façade. Along the south façade are rows of ribbon windows on the first and second floors and two main entrances, which are demarcated by brick garden walls, concrete staircases, concrete handicap ramps, and glazed aluminum doors with sidelights. The building's fenestration is composed of large plate-glass fixed windows with concrete canopies. To the north of the building are a loading dock and an office addition (Building N233A). Surrounding the entire building are landscaped elements, shrubs, street trees, and concrete curbs. This building serves as a central computing facility for wind tunnel data, general scientific data, data management, fluid dynamics, satellite data processing and numerical control. It is 52,400 sq. ft.

This building appears to be in good condition.
